AI AGENTS FOR BUSINESS

Put AI agents to work across your business.

Matrix helps teams build, connect, and deploy AI agents that take real action across your systems — safely, and in minutes, not months.

01

Build agents fast

Compose capable AI agents in minutes using pre-built connectors, tools, and templates — no need to start from scratch.

02

Connect to real systems

Agents plug directly into your existing apps and data sources, so they act on real, live information instead of guesses.

03

Operate with confidence

Built-in guardrails, permissions, and visibility mean agents run safely and your team stays in control at every step.

Ready to see Matrix in action? Explore the platform and find out how AI agents can start working for your team.
