

Matrix

AI AGENT PLATFORM

AI AGENT PLATFORM

Put AI agents to work across your business.

Matrix gives every team a platform to build, deploy, and manage AI agents that connect to real systems and get real work done — safely, and at scale.

— Why Matrix

Build agents fast

Compose capable AI agents in minutes using pre-built connectors, tools, and templates — no need to start from scratch.

Connect to real systems

Agents plug directly into your existing apps and data sources, so they act on real, live information instead of guesses.

Operate with confidence

Built-in guardrails, permissions, and visibility mean agents run safely and your team stays in control at every step.

Ready to see Matrix in action?

Explore the platform and find out how AI agents can start working for your team.
